

Gaddeepogu Shyamala

Kurnool, Andhra Pradesh — 9398508070 — shyamalagaddeepogu@gmail.com — GitHub — LinkedIn — Portfolio

Summary

Computer Science student with hands-on experience in AI/ML systems, reinforcement learning, full-stack development, and backend engineering. Passionate about multi-agent systems, microservices architecture, and scalable web applications. Shortlisted participant for the Anvil Hackathon Grand Finale at Scaler School of Technology.

Education

B.Tech – Computer Science and Engineering 2023 – 2027

G. Pullaiah College of Engineering and Technology, Kurnool

Class XII – BIEAP Narayana Junior College Score: 75% 2023

Class X – SSC Sri Lakshmi High School Score: 99.7% 2021

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL **Frameworks:** React, Next.js, Node.js, Spring Boot, FastAPI, Flask

AI/ML: PyTorch, Transformers, TRL, Unsloth, GRPO/PPO, Groq LLaMA, Multi-Agent Systems, LLM Fine-Tuning,

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Redis **DevOps & Cloud:** Docker, Kubernetes, AWS EKS/EC2, Terraform, GitHub Actions, Prometheus, Grafana, Netlify, Vercel, Firebase

Tools: Git, Postman, Jupyter, Tableau, Power BI, Linux, Kong API Gateway

Projects

Delivery Dispatcher Live Demo — GitHub

- Built a smart delivery management system with an interactive dashboard to monitor and streamline delivery operations through real-time updates and intelligent workflow handling.
- Developed a Flask-based backend with responsive frontend interfaces, enabling efficient tracking, processing, and operational visibility for delivery dispatch tasks.
- *Stack: Python, Flask, HTML, CSS, JavaScript, Docker, Hugging Face Spaces.*

Mock Interview Trainer GitHub

- Developed an AI-native platform simulating technical interviews with voice interaction, dynamic DSA challenges, and ATS resume intelligence.
- Architected 5 microservices (Auth, Resume, Interview, DSA, AI Engine) orchestrated via Kong API Gateway with JWT auth, rate limiting, and Pydantic validation.
- Deployed on Kubernetes (AWS EKS) with Terraform IaC, GitHub Actions CI/CD pipeline.
- *Stack: Python, FastAPI, Next.js, TypeScript, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, Terraform, AWS EKS.*

Travel Planning Agent GitHub

- Developed an AI-powered travel planning assistant that generates personalized day-by-day itineraries, travel recommendations, food suggestions, and trip guidance based on user prompts.
- Implemented a Flask-based backend API integrating OpenRouter and Gemini 2.0 Flash Lite for conversational itinerary generation and real-time response handling.
- *Stack: Python, Flask, REST API, OpenRouter API, Gemini 2.0 Flash Lite.*

Text To Image Generator GitHub

- Developed an AI-powered text-to-image generation system using Stable Diffusion to generate high-quality visuals from user prompts with multiple artistic styles.
- Implemented an interactive Gradio-based interface for prompt-driven image generation, enabling customizable outputs and seamless user interaction.
- *Stack: Python, Diffusers, PyTorch, Gradio, Hugging Face, Stable Diffusion.*

Achievements

Anvil Hackathon Grand Finale Shortlisted May 2026

Shortlisted for the Grand Finale of the Anvil Hackathon at Scaler School of Technology.

Certifications

ServiceNow Certified System Administrator (CSA) April 2026 View Certificate

Earned the official ServiceNow CSA certification covering platform administration, workflows, user management, and enterprise service management fundamentals.

Anvil Hackathon Participation Certificate May 2026 View Certificate

Received a certificate of recognition for participating in the Anvil Hackathon at Ascent 2026, organized by Scaler School of Technology, demonstrating technical problem-solving, collaboration, and innovation skills.
